

Volume index of industrial output

2020, February

Industrial output grew in February from the month before but fell from the previous year

Seasonally adjusted industrial output (TOL BCD) grew by 0.8 per cent in February from the previous month despite the steep decline of the forest industry. According to Statistics Finland, industrial output adjusted for working days was 0.1 per cent lower in February 2020 than in February 2019.

Examined by main industry, seasonally adjusted industrial output grew in February most in mining and quarrying, by 13.0 per cent and in the electronic and electrical industry, by 6.3 per cent. Growth was also recorded in the metal industry, up by 3.5 per cent, and in the industry of electricity, gas, steam and air conditioning supply, by 2.5 per cent from the month before. The industrial actions in the field in February dropped output strongly in the forest industry, which went down by 22.1 per cent compared with the previous month. In the chemical industry, output diminished by 0.2 per cent.

Revised data for February 2020 will be published at 8 am on 8 May 2020 in connection with the release of industrial output data for March 2020. The revision is influenced by the estimation used in the latest release, which is based on the Tax Administration's data on self-assessed taxes used for enterprises with fewer than 50 employees. Because of the method used, seasonally adjusted figures for previous months

may change even if the original figures do not become revised. The seasonally adjusted figures are also adjusted for working days.
