

Consumer Price Index

2018, November

Inflation 1.3 per cent in November

The year-on-year change in consumer prices calculated by Statistics Finland was 1.3 per cent in November. In October, inflation stood at 1.5 per cent. The slight decline in inflation from October to November was due to lower prices of vegetables, fuels and package tours abroad.

Inflation indicators in Finland, November 2018

	Point figure	Annual change (%)	Monthly change (%)
Consumer Price Index 2015=100	102.8	1.3	-0.0
Cost-of-living Index 1951:10=100	1960		
Harmonised Index of Consumer Prices 2015=100	103.1	1.4	0.1
Harmonised Index of Consumer Prices at Constant Taxes 2015=100	102.5	1.1	0.1

Consumer prices were raised most in November by increases in the prices of electricity, cigarettes and fuels and capital repair on detached house from one year ago. The rising of consumer prices from one year back was curbed most by reductions in the prices of child day care, mobile phones and detached houses. From October to November, the month-on-month change of consumer prices was -0,0 per cent.

Each mid-month, Statistics Finland's interviewers collect altogether around 50,000 prices on nearly 470 commodities from approximately 2,700 outlets for the Consumer Price Index. In addition, some 1,000 items of price data are gathered by centralised collection.

According to preliminary data, inflation in the euro area was 2.0 per cent in November

According to the preliminary data on the Harmonised Index of Consumer Prices, the rate of inflation in the euro area was 2.0 per cent in November. In October, it stood at 2.2 per cent. The corresponding figure for Finland in November was 1.4 per cent.

The Harmonised Index of Consumer Prices does not include owner-occupancy, games of chance, interests on consumption and other credits, fire insurance on owner-occupied dwellings, the vehicle tax or fishing and hunting fees. The consumption items included in the Harmonised Index of Consumer Prices, as well as the rules governing its compilation, have been defined in EU regulations.

Eurostat's estimate of inflation in the euro area is based on preliminary data from the Member States and on the price development of energy. Eurostat will publish detailed data on Harmonised Indices of Consumer Prices for November on 17 December. Information of inflation in EU countries is available on Eurostat homepage, (http://ec.europa.eu/eurostat/web/main).

The year-on-year change in the Harmonised Index of Consumer Prices at Constant Taxes was 1.1 per cent in November

The year-on-year change in the Harmonised Index of Consumer Prices stood at 1.4 per cent in November and that in the Index at Constant Taxes measuring market inflation at 1.1 per cent. Over twelve months, the combined raising impact on consumer prices from changes in commodity tax rates was thus 0.3 percentage points. The month-on-month change in the Harmonised Index of Consumer Prices was 0.1 per cent and that in the Index at Constant Taxes 0.1 per cent in November.

Harmonised Index of Consumer Prices at Constant Taxes

The inflation measured by Consumer Price Index consists mainly of products and services priced by enterprises and the public sector, and value added and commodity taxes. Some 25 per cent of the private consumption described by the Harmonised Index of Consumer Prices (HICP) consists of value added or other taxes. The Harmonised Index of Consumer Prices at Constant Taxes (HICP-CT) is based on the HICP so the two indices have the same weight structure and price data. HICP-CT is calculated with a method which holds the tax rate constant relative to the reference period. When tax changes take place, the impact of the tax change on commodity prices is eliminated from HICP-CT. The price impact of the tax changes is obtained by comparing the development of the HICP and HICP-CT.
