

New orders in manufacturing

2013, December

New orders in manufacturing decreased by 6.2 per cent year-on-year in December

According to Statistics Finland, the value of new orders in manufacturing was 6.2 per cent lower in December 2013 than twelve months earlier. In 2013, orders decreased by 6.9 per cent from 2012.

Change in new orders in manufacturing from corresponding month of the previous year (original series), % (TOL 2008)

The decline of new orders in manufacturing continued through December. Among the examined main industries, new orders increased in the chemical industry where growth amounted to 6.1 per cent compared with December 2012. In the metal industry, new orders decreased by 11.5 per cent and in the textile industry by 11.1 per cent. In the manufacture of paper, and paper and board products new orders remained almost on level with last year.

When interpreting these statistics it should be borne in mind that they typically show strong fluctuations by month. Even new orders of substantial value are not examined over extended time periods but for the statistical reference month only.

Change in new orders in manufacturing 12/2012-12/2013 (TOL 2008)

The index of new orders in manufacturing describes development in the value of new orders received by enterprises for commodities and services that are meant to be produced by establishments located in Finland. These statistics are based on non-probability sampling, in which the basic observation unit is an enterprise or a kind-of-activity unit. The sample comprises monthly 400 to 450 enterprises or their kind-of-activity units. Index point figures and annual change percentages are published monthly for five industry categories. The time series start from January 2005 and their base year is 2010 (2010=100). A detailed description of the statistics and the calculation method are included in the quality description on the home page of the statistics.
